BEYOND BROKE

A Domino Theory Riddle Comic

Inspired by @beyond_broke

Before any market moves, the first wall to fall is a way of thinking...

RIDDLE

His handle is also the name of the path: building wealth, and breaking a certain mindset. What two words did he give it?

He said the world's money systems are connected in ways most people never see.

RIDDLE

He wrote that financial systems aren't just connected — they're deeply intertwined, and can trigger massive chain reactions. What did he name this idea?

He pointed to one place as the start of the chain.

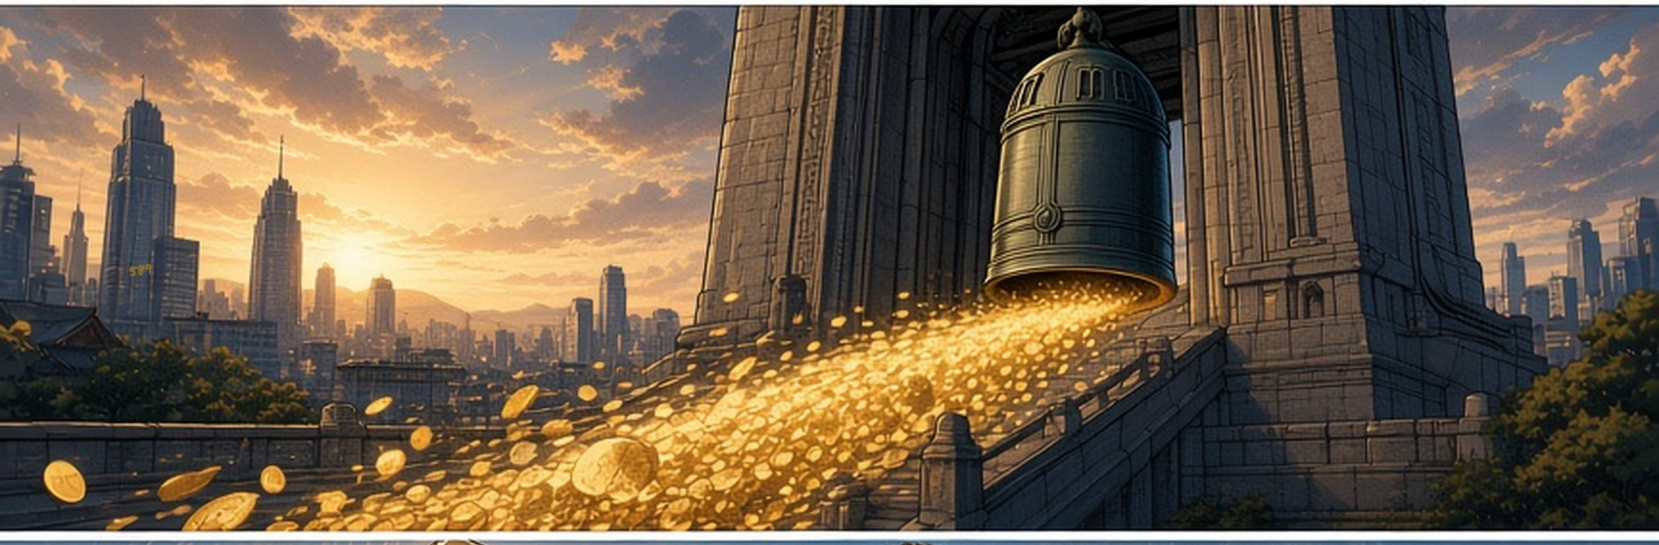

RIDDLE

Domino #1 in his thread was this country — the biggest foreign holder of US Treasuries, ahead of the G7 in building a digital currency. Where does the first domino stand?

For years, cheap yen funded higher-yielding assets abroad. He warned that can unwind.

RIDDLE

In later posts he said a move in Japan would unwind a famous trade funded by cheap yen. What trade does the Domino Theory watch?

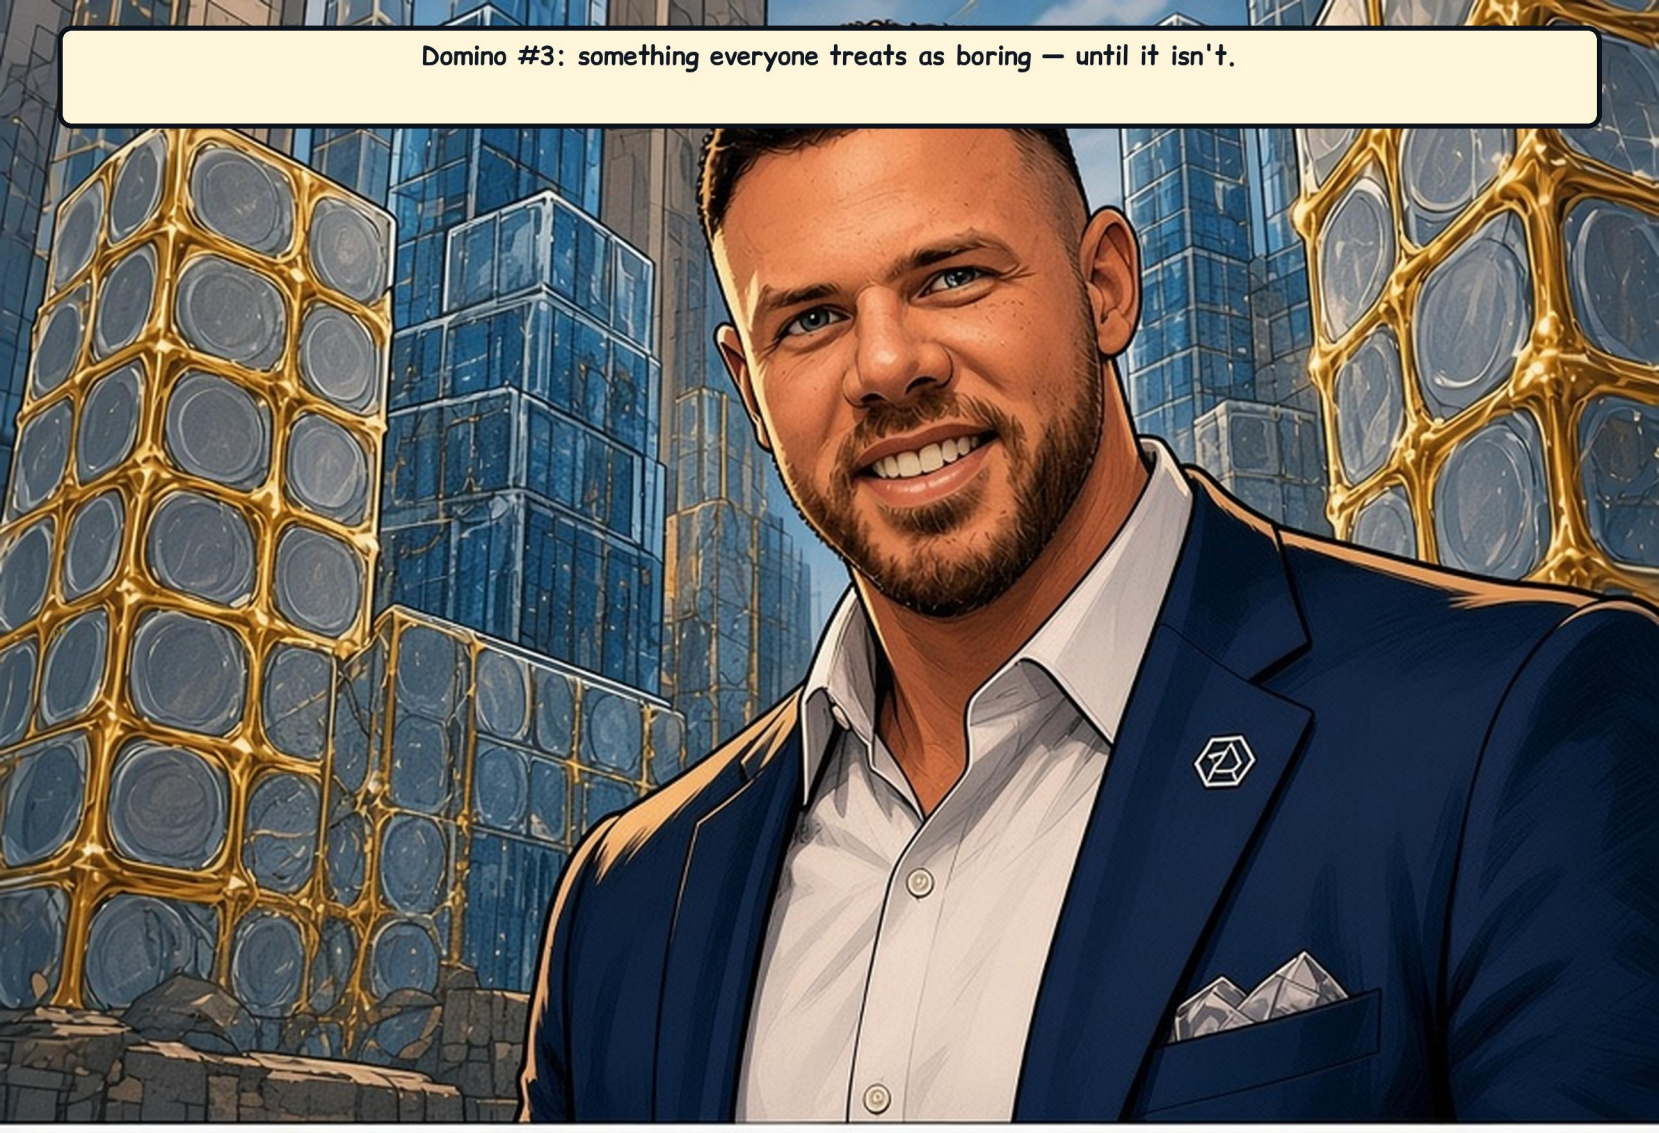

He said the chain was teetering, and named what might tip it.

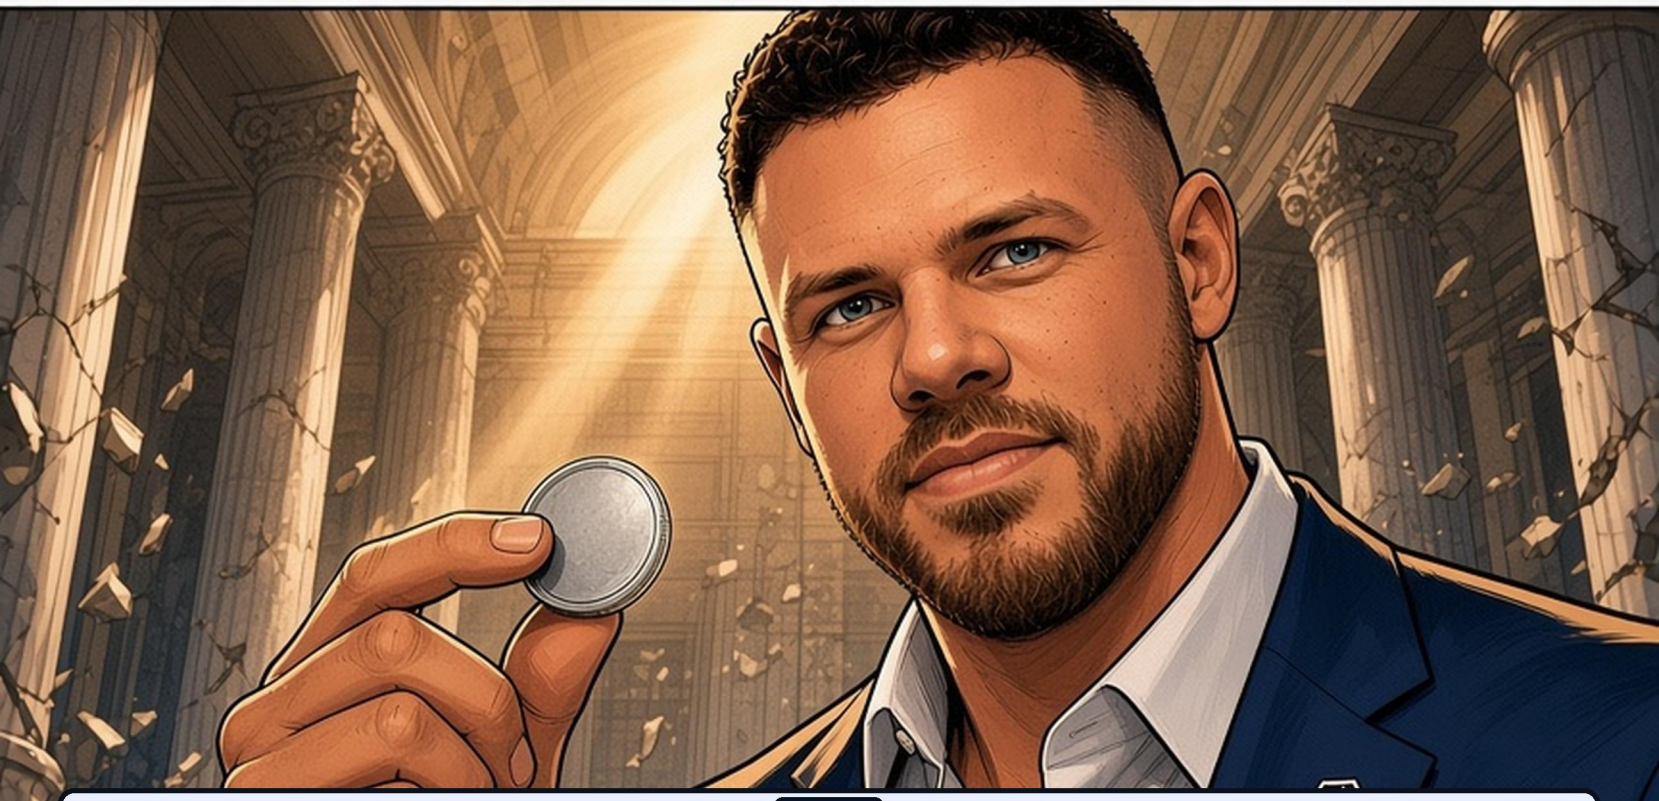

RIDDLE

When he said it was teetering on the edge, what did he say needed to kick that domino over?

Domino #3: something everyone treats as boring — until it isn't.

RIDDLE

In the thread he called these tokens "the glue holding crypto markets together." What did he name?

He said a crisis might push a certain asset into everyday use.

RIDDLE

In the theory, economic forces could push XRP into mainstream use — not as speculation, but as what two words?

A short warning he posted, in eight words.

RIDDLE

The tide always does this before a tsunami. What did he post?

Part 3 of the theory asked a careful question about a supply shock. It was a scenario — not a guarantee.

RIDDLE

The title of Domino Theory Part 3 asked whether an XRP supply shock could send the price to this number. What number did he put in the question?

Financial systems don't change overnight. But when dominoes start falling, they pick up speed.
RIDDLE
Four words from his bio, the mission at the end of the path. What is he building?

ANSWER KEY

1. Beyond Broke — his handle, and the name of the path: building wealth and breaking the broke mindset.
2. The (XRP) Domino Theory — financial systems, he wrote, aren't just connected; they're deeply intertwined and can trigger massive chain reactions.
3. Japan (and the digital yen) — Domino #1. He called Japan the biggest foreign holder of US Treasuries, and ahead of the G7 in building a CBDC.
4. The (yen) carry trade — the trade funded by cheap yen that, in later posts, he said a move in Japan could unwind.
5. Oil — when he said the chain was teetering on the edge, he wrote: "Need oil to kick that domino over."
6. Stablecoins (like Tether) — in the thread he called them "the glue holding crypto markets together."
7. Essential infrastructure — he wrote that economic forces could push XRP into mainstream use, "not as speculation, but as essential infrastructure."
8. "The tide always goes out before a tsunami." — a short warning he posted in October 2026.
9. $589 — the number in the title of Domino Theory Part 3, which asked whether an XRP supply shock could send the price there. A scenario he posed, not a guarantee.
10. Wealth beyond limits — four words from his public bio, the mission at the end of the path.

This comic is new fiction inspired by public posts from @beyond_broke (Jake Claver) and his published Domino Theory. It is not official canon and is not financial advice.

Five secret numbers are hidden in the art. Look closely for 123321, 589, 119, 22, and 13.

BEYOND BROKE. WEALTH BEYOND LIMITS.
